INTERNATIONAL SEARCH REPORT

(PCT Article 18 and Rules 43 and 44)

Applicant's or agent's file reference F-245-PCT	FOR FURTHER ACTION	as well	see Form PCT/ISA/220 as, where applicable, item 5 below.
International application No.	International filing date (day/m	onth/year)	(Earliest) Priority Date (day/month/year)
PCT/KR2004/000305	16 FEBRUARY 2004 (1	6.02.2004)	07 NOVEMBER 2003 (07.11.2003)
Applicant			
KANG, Hamm-chan			
This International search report has been prepared to Article 18. A copy is being transmitted to the		ning Authority a	nd is transmitted to the applicant according
This international search report consists of a to	otal of 3 sheets.		
It is also accompanied by a copy	y of each prior art document cite	d in this report.	
Basis of the report a. With regard to the language, the interlanguage in which it was filed, unless The international search we this Authority (Rule 23.1)	s otherwise indicated under this is was carried out on the basis of a	tem.	the international application in the international application furnished to
b. With regard to any nucleotide as	nd/or amino acid sequence disc	closed in the inte	ernational application, see Box No. I.
2. Certain claims were found uns	earchable (See Box No. II)		
3. Unity of invention is lacking (S	ee Box No. III)		
4. With regard to the title,			
the text is approved as submitted	by the applicant.		
the text has been established by t	this Authority to read as follows	3 :	
5. With regard to the abstract,			
X the text is approved as submitted by	by the applicant.		
the text has been established, acco	ording to Rule 38.2(b), by this A	uthority as it ap	pears in Box No. IV. The applicant
may, within one month from the d	ate of mailing of this internation	ial search report,	submit comments to this Authority.
6. With regard to the drawings,			
a. the figure of the drawings to be publish	ned with the abstract is Figure N	o. 2	
X as suggested by the applicant	t.		
because the applicant failed to	o suggest a figure.		
because this figure better char	racterizes the invention.		
b. none of the figure is to be published	d with the abstract.		

International application No. PCT/KR2004/000305

IPC7 A43B 13/14

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

IPC7 A43B

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched KR, JP: IPC as above

Electronic data base consulted during the international search (name of data base and, where practicable, search terms used)

C. DOCUMENTS CONSIDERED TO BE RELEVANT

Category*	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.
х	JP 10-165203A(Shimizu Shigeki) 23 June 1998 See page2 [0004]- page3 [0005], claim 1 Figures 1,5	1-2

- * Special categories of cited documents:
- "A" document defining the general state of the art which is not considered to be of particular relevance
- "E" earlier application or patent but published on or after the international filing date
- 'L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of citation or other special reason (as specified)
- 'O" document referring to an oral disclosure, use, exhibition or other
- "P" document published prior to the international filing date but later than the priority date claimed
- "T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- "X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- "Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art
- "&" document member of the same patent family

Date of the actual completion of the international search

05 AUGUST 2004 (05.08.2004)

WRITE AN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

.ternational application No.

PCT/KR2004/000305

Box No. I Basis of this opinion
 With regard to the language, this opinion has been established on the basis of the international application in the language in which it was filed, unless otherwise indicated under this item.
This opinion has been established on the basis of a translation from the original language into the following language, which is the language of a translation furnished for the purposes of international search (under Rules 12.3 and 23.1(b)).
2. With regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of:
a. type of material
a sequence listing
table(s) related to the sequence listing
b. format of material
in wirtten format
in computer readable form
c. time of filing/furnishing
contained in the international application as filed.
filed together with the international application in computer readable form.
furnished subsequently to this Authority for the purposes of search.
In addition, in the case that more than one version or copy of a sequence listing and/or table relating thereto has been
filed or furnished, the required statements that the information in the subsequent or additioanl copies is identical to that
in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.
Additional comments:

WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No.

PCT/KR2004/000305

Box No. V Reasoned statement under Rule 43bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

Novelty (N)	Claims 1-3	YES
	Claims	NO
Inventive step (IS)	Claims 3	YES
	Claims 1-2	NO NO
Industrial applicability (IA)	Claims 1-3	YES
	Claims	NO

2. Citations and explanations:

D1 : JP-A-10165203

I-Novelty

D1 is considered to represent the most relevant state of the art. It discloses a sole part and a shoe securing required weight in a place of heavy inner pads and further having comfortability to use and sufficient durability. The subject matter of D1 differs from the present claim 1 not only in that the space(3) formed in the inside area of a shoe is not circular type, but also in that the form of weight member is a plate or a block. Thus, the novelty of the subject matter claimed can be acknowledged.

II-Inventive step:

(1) Concerning claim 1

D1 discloses that a certain numbers of hole-shaped spaces are formed in the central portion of a sole of a shoe except for an upper surface of outer peripheral part of the sole of said shoe. It also shows that the weight members in the form of a plate or a block are inserted in said spaces in the sole. Claim 1 discloses that multiple circular-shaped spaces are formed in the central portion of a sole of a shoe, and a circular weight members are inserted in said spaces in the sole. So the comparison between D1 and claim 1 shows that the only difference is the shape of hole and weight member. A slight change in the shape of the present invention comes within the scope of the customary practice done by a person skilled in the art. Also, the effect caused from a circular shape weight member in claim 1, compared with that from the longitudinal shape weight member in D1 is not being testified by concerning specification. Therefore, the subject matter of claim 1 does not appear to involve an inventive step in the sense of Article 33(3) PCT.

(2) Concerning claim 2

D1 discloses that the weight members in the sole close to the heel part are larger than those in the front part of the sole of a shoe. Claim 2 shows the same arrangement of the weight members according to the size of weight members. Therefore, the subject matter of claim 1 does not appear to involve an inventive step in the sense of article 33(3) PCT.
